Investment strategy

In seeking to achieve the investment objective of the Fund will employ a passive management approach designed to track the performance of the Index, before taking into account fees and expenses. The Fund will seek to track the relevant Index by adopting a 'sampling' strategy. Under this approach, a Fund will not hold all of the securities comprising the relevant Index and may hold securities in weightings which differ from the Index. A sampling strategy is often used for funds tracking an index that is too broad to efficiently purchase all of the index's securities.
