Distribution details

ANNUALISED DISTRIBUTION

1. Forecast (annualised).

The distribution rate of 6.50 cents per unit (annualised) for the December 2025 quarter was in line with the 2026 financial year forecast. Please note, this forecast distribution rate reflects the current performance of the Fund. It is predictive in nature and is subject to assumptions, risks and circumstances (both known and unknown) outside of the control of the Fund, including that all tenants will satisfy their contractual obligations under their respective leases within a timely manner. The forecast also assumes there are no significant unforeseen capital costs and no material changes to the Fund's financial obligations. The actual distributions may differ from the forecast figures.

Management is currently preparing budgets for the 2027 financial year ('FY27'). The recent increase in interest rates, as well as forecast increases, are expected to place downward pressure on the forecast FY27 distribution rate. The full impact of interest rates on forecast distributions (if any) will be assessed as part of our budgeting process and confirmed in our next investor update in July 2026.

1. Based on most recent unaudited accounts as at 31 December 2025 and in addition to the \$0.27 early return of capital made in March 2021.
2. December 2025 quarter, annualised.
3. As at 31 December 2025.
4. 50% interest.
5. Based on the Product Disclosure Statement dated 8 April 2015.
6. After deducting the \$0.27 early return of capital made in March 2021.
