Education Bond Betashares Global Shares Currency Hedged

Investment strategy

In seeking to achieve the investment objective the Fund will obtain investment exposure to the securities listed in the index indirectly, by investing substantially all of its assets in units of the Betashares Global Shares ETF, an exchange traded fund admitted to trading on the ASX. As the Fund is hedged to Australian dollars, for index-tracking purposes, the Fund intends to hedge the currency exposure using forward foreign exchange contracts (or similar instruments), with the objective of substantially offsetting the Fund's exposure to movements in the relevant foreign currency. While this approach seeks to minimise the impact of currency fluctuations on Fund returns, it does not necessarily eliminate exposure to all currency fluctuations.
